Objective and Investment Policy

The Investment Objective of the Sub-Fund is to invest on the primary market in a diversified portfolio of green debt instruments, aligned with the ESG Policy of the Green Credit Continuum Program, as suitable investment opportunities arise over the course of the Investment Period. Such investments will seek to meet two sets of requirement: (i) enhanced yield compared to traditional green bond instruments, and (ii) additionality, by targeting debt instruments with higher impact than traditional investment-grade green bonds.

Eligible green debt assets include green high yield corporate bonds, green private debt instruments (including Euro and US private placements, loans and schuldscheindarlehen transactions) and green asset-backed securities, either issued by (i) European Union-based issuers and with proceeds mainly financing projects located in the European Union, or (ii) issuers with headquarters in the OECD if the proceeds exclusively finance projects in the European Union.

The Sub-Fund may hold cash and deposits, and invest in money market instruments, funds and other liquid assets on a temporary basis.

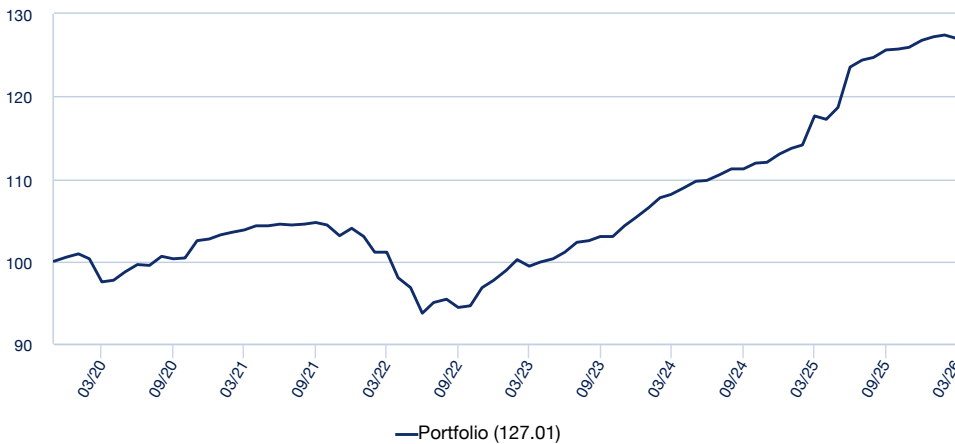

Mission statement and background

The Green Credit Continuum Program, launched by Amundi in partnership with the European Investment Bank (EIB), has been set up to expand the green bond market in Europe beyond investment-grade green bonds, through the development of other segments that are as of yet underdeveloped and have strong potential to grow: high yield green corporate bonds, green private debt instruments, and green asset-backed securities. Such instruments enable investors to meet two objectives: (i) yield pick-up, and (ii) additionality, in the sense of additional positive impact on the transition to a low-carbon economy, above and beyond what would have been financed anyway. As such, the Program is fully in line with the European Green Deal and the European Commission Action Plan on Sustainable Finance.

The Program has been designed to stimulate both the demand and the supply of such green debt instruments. On the demand side, the Program raises capital from private investors, leveraging on the European Investment Bank's own cornerstone investment and Amundi and the EIB's combined expertise. These Funds are entirely and independently managed by Amundi. On the Supply Side, the Program provides support to all stakeholders (issuers, structurers etc.) to set and disseminate best practices for these growing segments.

Management commentary

Despite the macro volatility, European credit remained relatively resilient throughout March, with spreads widening only modestly relative to the scale of the move in rates. March was dominated by a sharp rates repricing driven by the energy shock linked to Middle East tensions, which pushed oil and gas prices materially higher and forced markets to reassess the monetary policy outlook. The month also saw some negative headlines around private credit markets, while uncertainty over US tariffs and potential AI disruption remained in the background. In Europe, inflation moved back above the ECB's target, with headline euro area CPI rising to 2.5% year-on-year, mainly driven by energy prices. Importantly, core inflation remained more contained at around 2.3%, suggesting that second-round effects are still limited for now. This left the ECB in a cautious but increasingly hawkish stance. Markets moved from pricing stability to anticipating two to three hikes over 2026. The German 2-year bond rose from 2% to close to 2.62%. On the US side, the Fed also left rates unchanged, with a similarly cautious message. Market expectations shifted away from an aggressive cutting cycle toward a much slower easing path, with only one cut now broadly expected later in the year.

Corporate balance sheets, especially in European IG financials and non-financial corporates, remain healthy. After an exceptionally strong start of the year - with record issuance volumes in January and February - activity naturally slowed in March, but the market remained open across both investment grade and selected high yield names.

In this backdrop, the Euro Corporate IG market posted a total return of -2.27% for the month. Euro IG spreads widened, ending the period at 97 bps (+14bp) whereas German 10-year increased by 36bps over the same period. Financials underperformed the non-financials during the month. Bank AT1s posted a total return of -2.77% over the month, hybrids returned -1.97%, and high-yield bonds returned -2.67% over the same period.

The green bond market was quieter in March, with €24bn of new issuance. Sovereigns were the most active, the U.K. led issuance with €7bn of green bonds, followed by Germany with €4bn

Important information

This document is provided for information purposes only and does not constitute a recommendation, a solicitation, an offer, advice or an invitation to purchase or sell any units or shares of the fund (FCP), collective employee fund (FCPE), SICAV, SICAV sub-fund or SICAV investing primarily in real estate (SPPICAV) (collectively, "the Funds") described herein and should in no case be interpreted as such. This document is not a contract or commitment of any form. Information contained in this document may be altered without notice. The management company accepts no liability whatsoever, whether direct or indirect, that may arise from the use of information contained in this document. The management company can in no way be held responsible for any decision or investment made on the basis of information contained in this document. The information contained in this document is disclosed to you on a confidential basis and shall not be copied, reproduced, modified, translated or distributed without the prior written approval of the management company, to any third person or entity in any country or jurisdiction which would subject the management company or any of the funds, to any registration requirements within these jurisdictions or where it might be considered as unlawful. Not all of the funds are systematically registered in all jurisdictions of all investors. Investment involves risk. The past performances shown in this document, and simulations based on these, do not guarantee future results, nor are they reliable indicators of future performance. The value of an investment in units or shares of the funds may fluctuate according to market conditions and cause the value of an investment to go up or down. As a result, fund investors may lose all or part of the capital originally invested. All potential investors in the funds are advised to ascertain whether such an investment is compatible with the laws to which they are subject and the tax implications of such an investment prior to investing, and to familiarise themselves with the legal documents in force for each fund. Concerning mandates, this document is a part of the periodic statement of the management activities of your portfolio and must be read in conjunction with any other periodic statement or notice of confirmation provided by your custodian and related to the transactions of your portfolio. Unless stated otherwise, the management company is the source of the data in this document. The date of the data in this document is that indicated at the top of the document, unless otherwise stated.

This material is solely for the attention of institutional, professional, qualified or sophisticated investors and distributors. It is not to be distributed to the general public, private customers or retail investors in any jurisdiction whatsoever nor to "US Persons". Moreover, any such investor should be, in the European Union, a "Professional" investor as defined in Directive 2004/39/EC dated 21 April 2004 on Markets In Financial Instruments ("MiFID") or as the case may be in each local regulations and, as far as the offering in Switzerland is concerned, a "Qualified Investor" within the meaning of the provisions of the Swiss Collective Investment Schemes Act of 23 June 2006 (CISA), and its implementing Ordinance of 22 November 2006 (CISO) and the FINMA's 2013/9 on distribution within the meaning of the legislation on Collective Investment. In no event may this material be distributed in the European Union to non "Professional" investors as defined in the MiFID or in each local regulation, or in Switzerland to investors who do not comply with the definition of "qualified investors" as defined in the applicable legislation and regulation.

BOND ■

Green Bonds Lexicon

Green/Sustainable/Social Bonds breakdown

Green bonds are fixed income instruments for which the proceeds are specifically designated for projects with clearly defined environmental benefits. Eligible projects include, but are not limited to, renewable energy, energy efficiency (including efficient buildings), sustainable waste management, sustainable land use, biodiversity conservation, clean transportation and clean water. The issuer should outline the decision-making process it follows to determine the eligibility of an individual investment in the legal documentation for the security:

- 1) Use of proceeds
- 2) Project evaluation and selection
- 3) Management of proceeds
- 4) Reporting

EU Environmental Objectives

The Green Credit Continuum Program has been designed to support the European Union Climate Goals and the European Union Sustainable Finance agenda, in that it aims to expand financing of environmental investments while fostering best standards and practices in project selection and impact assessment and reporting.

All green projects financed by the Fund will be in line with the European Union's 6 environmental objectives. These are:

- Climate change mitigation
- Climate change adaptation
- Sustainable use of water and marine resources
- Transition to a circular economy, waste prevention and recycling
- Pollution prevention and control
- Protection of healthy ecosystems

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:

- “E” for Environment (energy and gas consumption levels, water and waste management, etc.).
- “S” for Social/Society (respect for human rights, health and safety in the workplace, etc.).
- “G” for Governance (independence of board of directors, respect for shareholders’ rights, etc.)

Rating scale from A (best score) to G (worst score)
