The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Amundi Funds II - Global Multi-Asset Conservative

Class A EUR Non-Distributing - LU0916716201

A Sub-Fund of Amundi Funds II

Management Company: Amundi Luxembourg S.A.

>> Objectives and Investment Policy

Objective Seeks to increase the value of your investment and to provide income over the recommended holding period.

Portfolio securities The Sub-Fund mainly invests in a broad range of bonds from around the world as well as money market securities. This may include government, corporate or other bonds. The Sub-Fund may also invest up to 30% of its assets in equities worldwide. The Sub-Fund may invest up to 10% of its assets in contingent convertible bonds. The Sub-Fund may use derivatives to reduce various risks, for efficient portfolio management or as a way to gain exposure to various assets, markets or income streams.

Investment process The investment manager uses its own global economic analysis to determine the most attractive asset types and geographical regions, then uses analysis of individual issuers to identify individual securities that offer the best potential gain for the risk involved.

This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.

>> Risk and Reward Profile

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The lowest category does not mean a 'risk-free' investment. The Sub-Fund's risk indicator is not guaranteed and may change over time. The Sub-Fund's risk category reflects the risk profile of the mix of asset classes in which it invests.

For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

Terms to Understand

Bonds Securities that represent an obligation to repay a debt, with interest.

Contingent convertible capital bonds absorb losses when the capital of the issuing bank falls below a certain level. Investors may be subject to a temporary or permanent write down of capital or the conversion of the bond into equity.

Derivatives Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Equities Securities that represent partial ownership of a company.

Recommended for retail investors

- With a basic knowledge of investing in funds and no or limited experience of investing in the Sub-Fund or similar funds
- Who understand the risk of losing some or all of the capital invested
- Seeking to increase the value of their investment over the recommended holding period of 4 years

Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

Counterparty risk Contract parties may default on their obligations under derivatives contracts entered into with the Sub-Fund.

Credit risk The issuers of bonds held by the Sub-Fund may fail to pay principal or interest due.

Operational risk Losses may occur due to human error or omission, process errors, system disruptions or external events.

Derivatives risk Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.
