Key Information Document production date: 16/06/2025.

What is this product?

Type: Units of AMUNDI EURO LIQUIDITY SHORT TERM GOVIES, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

Term: The product has a duration of 99 years. The Management Company may dissolve the product by means of liquidation or merger with another product in accordance with legal requirements.

AMF Classification ("Autorité des Marchés Financiers"): Short-Term Variable Net Asset Value Money Market UCI

Objectives: By subscribing to AMUNDI EURO LIQUIDITY SHORT TERM GOVIES, you are exclusively investing in debt securities issued or guaranteed by Eurozone governments, supranational bodies and sovereign agencies (bonds, treasury bills etc.) with a maximum maturity of 397 days.

The management objective is to maintain the capital invested and achieve performance equal to the capitalised €STR, the representative index of the Eurozone currency rate, less ongoing charges. However, in certain market situations such as the €STR being very low, the net asset value of your Fund may experience a structural decline and negatively impact the yield of your Fund, which may compromise the objective to maintain the capital of your Fund.

In order to achieve this, the management team selects high-quality money market instruments issued or guaranteed by public entities (Eurozone governments, supranational bodies and sovereign agencies). These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process. In order to assess the credit quality of these instruments, the management company has implemented an internal credit quality assessment procedure for UCIs, which aims to establish the principles and methodology that can ensure that the UCIs are investing in assets with a positive credit quality assessment. The internal credit quality assessment procedure, which is applied systematically and permanently to the entirety of Amundi group money-market management, establishes:

- the principles of prudence, adequacy and relevance at all key stages affecting the investment cycle, and
- the analytical methodologies that make it possible to determine not only the eligibility of credits for purchase by the money market fund, but also the monitoring of invested credits that may be deteriorating in order to avoid retaining those that are likely to default.

The strategy is implemented in accordance with the following risk restrictions:

- with regard to interest rate sensitivity, the average weighted maturity of the assets is less than or equal to 60 days;
- with regard to credit and liquidity risk, the maximum residual life of the securities and instruments shall not exceed 397 days and the weighted average life until the date of full redemption of the securities shall not exceed 120 days.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The UCI is classified Article 8 within the meaning of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation").

Environmental, social and governance criteria (ESG) contribute to the investment manager's decision-making process, without being a key factor in this decision making.

Intended retail investors: This product is intended for investors with a basic knowledge and/or little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are prepared to assume a medium level of risk on their initial capital.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website www.amundi.com and/or in the prospectus).

Redemption and transaction: Units may be sold (redeemed) daily as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the AMUNDI EURO LIQUIDITY SHORT TERM GOVIES prospectus.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for one day to one month.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

The use of complex products such as derivatives can lead to increased movement of securities in your portfolio.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI EURO LIQUIDITY SHORT TERM GOVIES prospectus.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

What happens if Amundi Asset Management is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the Management Company. In the event of default by the Management Company, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss to the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
