## Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The risk indicator assumes you keep the product for 1 Day. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

## Management commentary

## Environment:

The ceasefire that came into effect at the beginning of April has provided some respite but has not significantly reduced uncertainties. The Strait of Hormuz remains closed to navigation, heightening fears of a resurgence in inflation and disruption of supply chains.

The US economy grew at an annualized rate of 2% in the first quarter of 2026, recovering from the federal government shutdown but remaining below the consensus forecast of 2.3%. Growth was driven by significant corporate investments in artificial intelligence, although consumer spending growth was weaker than expected. Despite headwinds from the war in Iran, the S&P 500 and Nasdaq reached record highs in April, posting their best month since 2020 with a 10% increase in the S&P 500.

Inflation accelerated sharply in March, with the PCE index reaching 3.5%, its highest level since 2023. The rise in energy prices linked to the war in Iran largely contributed to this increase. Annual CPI inflation stood at 3.3% in April 2026. The Conference Board's Leading Economic Index fell by 0.6% in March, signaling a slowdown in upcoming growth, with higher oil prices likely putting additional upward pressure on inflation.

The labor market remained exceptionally strong. Weekly jobless claims fell to 189,000 for the week ending April 25, their lowest level in over 50 years. The unemployment rate stood at 4.3% in April, with 178,000 nonfarm payroll jobs created. Layoffs dropped to their lowest level in 55 years.

The Fed kept its benchmark rate steady at 3.75% in April, marking its third consecutive pause. However, the decision revealed deep divisions, with four dissenting members – the most divided meeting in 30 years. Three dissenters challenged the language suggesting possible future rate cuts. Fed Chair Jerome Powell described economic growth as “solid” but highlighted the uncertainty related to the war in Iran. White House advisor Kevin Hassett stated that raising rates in response to a temporary spike in energy prices would be a policy mistake.

## Management:

## Liquidity

Instant liquidity was essentially provided by overnight term deposit operations.

## Interest rate risk

The portfolio's weighted average maturity (WAM) stands at 18 days.

## Credit risk

Short-term credit spreads widened slightly by 1 to 2bps on the 3-month to reach 17bps and by 1bp on the year to reach 36bps.

The weighting in bond securities at month-end is around 5%.

## Average life and average rating

The weighted average life (WAL) of this portfolio, which belongs to the “short-term money market” category, is 65 days. The portfolio's average long-term rating remains at a solid AA level.

## SRI Terminology

## Socially Responsible Investment (SRI)

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

Focus on Environmental, Social and Governance key performance indicators

In addition to the overall ESG assessment of the portfolio and the E, S and G dimensions, the manager uses impact indicators to assess the ESG quality of his portfolio. Four representative indicators of Environment, Social, Human Rights and Governance have been identified. The manager's minimum objective is to deliver a quality score higher than that of the index on at least two of the indicators.

Environment<sup>1</sup>

Carbon intensity per euro million of sales

Total carbon intensity (Portfolio/Index) : 6.97 / 177.12

This indicator measures the average emissions in metric tonnes of carbon equivalent per unit of a company's revenue (€ million of sales). This is an indicator of the carbon intensity of the value chain of the companies in the portfolio.

**Sources and definitions**

**1. Environmental indicator/Climate indicator:** Carbon intensity (in metric tons of CO<sub>2</sub> per million of revenue). This data is provided by Trucost, This corresponds to companies' annual greenhouse gas emissions expressed in metric tons of carbon dioxide equivalent. (CO<sub>2</sub>e). It covers the six greenhouse gases identified in the Kyoto Protocol with emissions converted into global warming potential (GWP) in CO<sub>2</sub> equivalent.

Definition of scopes:

- Scope 1: All direct emissions from sources that are owned or controlled by a company.
- Scope 2: All indirect emissions arising from the purchase or production of electricity, steam or heat.
- Scope 3: All other indirect emissions, upstream and downstream of the value chain. For reasons of data robustness, Amundi has chosen to use emissions from activities upstream of Scope 3
- Source: Trucost EEI-O model (input/output model extended to the Trucost environment).

**2. Management diversity.** Average percentage of women managers. This indicator gives a more global measure of the advancement of women within the company than the data limited to the number of women Board members. Data provider: Refinitiv

**3. Human Rights Compliance Indicator.** percentage of companies with policies that exclude forced or obligatory child labor or that guarantee freedom of association and which are applied universally regardless of local laws. This indicator enables better assessment of fundamental human rights issues. Data provider: Refinitiv

**4. Board independence.** average percentage of independent directors on the Board of Directors. Data provider: Refinitiv

For these 4 indicators, the total for the portfolio/investment universe is equal to the companies' average for these indicators adjusted for their weight in the portfolio/investment universe.

**ESG Terminology**

**ESG criteria**

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:  
 "E" for Environment (energy and gas consumption levels, water and waste management, etc.).  
 "S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).  
 "G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

**ESG Rating**

**The issuer's ESG rating:** each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).  
**ESG rating of the investment universe and the portfolio:** the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers' scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

**Amundi ESG Mainstreaming**

In addition to complying with Amundi Responsible Investment Policy<sup>4</sup>, Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

<sup>1</sup> The investment universe reference is defined by either the fund's reference indicator or an index representative of the ESG-related investable universe.  
<sup>2</sup> Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight) that can be related.  
<sup>3</sup> Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
