Article 8 ■

Objective and Investment Policy

The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

To achieve long-term capital growth.

The Sub-Fund invests at least 75% of net assets in equities of companies that are headquartered and listed in the Eurozone, with a minimum of 51% of net assets in equities which have a market capitalisation below the maximum market capitalisation of the benchmark. Investments may be extended to other European Union member states, depending on the expectations regarding which countries may subsequently become part of the Eurozone.

The Sub-Fund makes use of derivatives to reduce various risks and for efficient portfolio management.

Benchmark : The Sub-Fund is actively managed and seeks to outperform the MSCI EMU Small Cap Index. The Sub-Fund is mainly exposed to the issuers of the benchmark, however, the management of the Sub-Fund is discretionary, and will invest in issuers not included in the benchmark. The Sub-Fund monitors risk exposure in relation to the benchmark however the extent of deviation from the Benchmark is expected to be material. Further, the Sub-Fund has designated the benchmark as a reference benchmark for the purpose of the Disclosure Regulation. The Benchmark is a broad market index, which does not assess or include constituents according to environmental characteristics, and therefore is not aligned with the environmental characteristics promoted by the Sub-Fund.

Management Process : The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The investment team selects equities based on fundamental analysis (bottom-up), constructing a concentrated portfolio that consists of those securities about which the investment team has conviction. The Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of the Benchmark.

Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the Amundi Funds prospectus.

SRI Terminology

Socially Responsible Investment (SRI)

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

¹ If an issuer's rating is downgraded to E, F or G, the manager has a period of three months in which to sell the security. A tolerance is authorized for buy and hold funds.

² Outstanding securities in terms of ESG criteria excluding cash assets.

³ The investment universe is defined by the fund's reference indicator. If the fund does not have an indicator, it is defined by type of security, geographic zone and investment themes and business sectors.

This document is designed exclusively for institutional, professional, qualified or sophisticated investors and distributors. It is not meant for the general public or private clients of any jurisdiction or those qualified as 'US Persons'. Approved investors in regard to the European Union are those which are defined as "Professional" investors in Directive 2004/39/EC of 21 April 2004 "MiFID" or, as the case may be, as defined under each local legislation and, insofar as the offer in Switzerland is concerned, "qualified investors" as set forth in the federal Law on Collective Investments (LPCC), the Ordinance on collective investments of 22 November 2006 (OPCC) and the FINMA 08/8 Circular regarding the legislation on collective investments of 20 November 2008. This document shall not, under any circumstance, be sent within the European Union to non "Professional" investors as defined by the MFI or under each local legislation, or in Switzerland to those investors which are not defined as "qualified investors" in the applicable law and regulations.

EQUITY ■

Focus on Environmental, Social and Governance key performance indicators

In addition to the overall ESG assessment of the portfolio and the E, S and G dimensions, the manager uses impact indicators to assess the ESG quality of his portfolio. Four representative indicators of Environment, Social, Human Rights and Governance have been identified. The manager's minimum objective is to deliver a quality score higher than that of the index on at least two of the indicators.

For these 4 indicators, the total for the portfolio/investment universe is equal to the companies' average for these indicators adjusted for their weight in the portfolio/investment universe.

Environment¹

Carbon Intensity: carbon emissions per euro million of sales

Total carbon intensity (Portfolio/Benchmark) : 107.71 / 168.45

This indicator measures the average emissions in metric tonnes of carbon equivalent per unit of a company's revenue (€ million of sales). This is an indicator of the carbon intensity of the value chain of the companies in the portfolio.

Sources and definitions

1. Environmental indicator/Climate indicator: Carbon intensity (in metric tons of CO2 per million of revenue). This data is provided by Trucost, This corresponds to companies' annual greenhouse gas emissions expressed in metric tons of carbon dioxide equivalent. (CO2e). It covers the six greenhouse gases identified in the Kyoto Protocol with emissions converted into global warming potential (GWP) in CO2 equivalent.

Definition of scopes:

- Scope 1: All direct emissions from sources that are owned or controlled by a company.
- Scope 2: All indirect emissions arising from the purchase or production of electricity, steam or heat.
- Scope 3: All other indirect emissions, upstream and downstream of the value chain. For reasons of data robustness, Amundi has chosen to use emissions from activities upstream of Scope 3
- Source: Trucost EEI-O model (input/output model extended to the Trucost environment).

2. Management diversity. Working conditions score: indicator that takes into consideration the companies investing in the development of their human capital (training, career management) and providing satisfactory working conditions, particularly in terms of health and safety. Data source : Refinitiv.

3. Human Rights Compliance Indicator. percentage of companies with policies that exclude forced or obligatory child labor or that guarantee freedom of association and which are applied universally regardless of local laws. This indicator enables better assessment of fundamental human rights issues. Data provider: Refinitiv

4. Board independence. average percentage of independent directors on the Board of Directors. Data provider: Refinitiv

For these 4 indicators, the total for the portfolio/investment universe is equal to the companies' average for these indicators adjusted for their weight in the portfolio/investment universe.

ESG Rating

The issuer's ESG rating: each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).

ESG rating of the investment universe and the portfolio: the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers' scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy⁴, Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

¹ The investment universe reference is defined by either the fund's reference indicator or an index representative of the ESG-related investable universe.
² Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight) that can be related.
³ Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
