Assets Under Management (AUM) :  
**135.35 (million EUR)**  
ISIN code : **LU2041866182**

## Objective and Investment Policy

The Investment Objective of the Sub-Fund is to invest on the primary market in a diversified portfolio of green debt instruments, aligned with the ESG Policy of the Green Credit Continuum Program, as suitable investment opportunities arise over the course of the Investment Period. Such investments will seek to meet two sets of requirement: (i) enhanced yield compared to traditional green bond instruments, and (ii) additionality, by targeting debt instruments with higher impact than traditional investment-grade green bonds.

Eligible green debt assets include green high yield corporate bonds, green private debt instruments (including Euro and US private placements, loans and schuldscheindarlehen transactions) and green asset-backed securities, either issued by (i) European Union-based issuers and with proceeds mainly financing projects located in the European Union, or (ii) issuers with headquarters in the OECD if the proceeds exclusively finance projects in the European Union.

The Sub-Fund may hold cash and deposits, and invest in money market instruments, funds and other liquid assets on a temporary basis.

### Mission statement and background

The Green Credit Continuum Program, launched by Amundi in partnership with the European Investment Bank (EIB), has been set up to expand the green bond market in Europe beyond investment-grade green bonds, through the development of other segments that are as of yet underdeveloped and have strong potential to grow: high yield green corporate bonds, green private debt instruments, and green asset-backed securities. Such instruments enable investors to meet two objectives: (i) yield pick-up, and (ii) additionality, in the sense of additional positive impact on the transition to a low-carbon economy, above and beyond what would have been financed anyway. As such, the Program is fully in line with the European Green Deal and the European Commission Action Plan on Sustainable Finance.

The Program has been designed to stimulate both the demand and the supply of such green debt instruments. On the demand side, the Program raises capital from private investors, leveraging on the European Investment Bank's own cornerstone investment and Amundi and the EIB's combined expertise. These Funds are entirely and independently managed by Amundi. On the Supply Side, the Program provides support to all stakeholders (issuers, structurers etc.) to set and disseminate best practices for these growing segments.

## Returns (Source: Fund Admin) - Past performance does not predict future returns

### Performance evolution (rebased to 100) from 29/11/2019 to 27/02/2026\* (Source: Fund Admin)

### Annualised Returns \* (Source: Fund Admin)

	YTD	1 month	3 months	1 year	3 years	5 years	Since
Since	31/12/2025	30/01/2026	28/11/2025	28/02/2025	28/02/2023	26/02/2021	29/11/2019
Portfolio	0.42%	0.08%	1.11%	4.57%	5.94%	2.83%	2.81%

### Calendar year performance \* (Source: Fund Admin)

	2025	2024	2023	2022	2021	2020	2019	2018	2017	2016
Portfolio	5.15%	7.24%	7.69%	-6.07%	1.07%	2.19%	-	-	-	-

\* Source : Fund Admin. Returns are annualised returns for periods exceeding 1 year (365 days basis). The above results pertain to full 12-month period per calendar year. All performances are calculated net income reinvested and net of all charges taken by the Sub-Fund. The value of investments may vary upwards or downwards according to market conditions.

**Management commentary**

European credit underperformed slightly in February: spreads widened over the month and headline total returns remain positive year-to-date, but sector-specific stress and rising cross-asset volatility created notable dispersion beneath the surface. Market uncertainty is elevated, driven by private credit developments, the confrontation between the US-Israel and Iran, and ongoing AI headlines.

The escalation in geopolitical risk became tangible after the US-Israel launched strikes on strategic targets in Iran and moved against the incumbent government, prompting concerns that higher commodity prices could reignite inflation. Paradoxically, this anxiety drove a sharp, rapid increase in EUR and USD yields at the end of the month, when a conventional "flight-to-quality" would have been expected to push sovereign yields lower.

ECB held rates steady in early February for a fifth meeting; President Lagarde said the bank is in a "good place," and officials expect inflation to return to the 2% target medium-term despite January's dip to 1.7%. Euro-area growth rebounded in February as demand picked up (factory new orders 50.9 vs. 49.2), led by a four-month high in Germany. In the U.S., CPI fell in January (-0.3% to 2.4% YoY) and Q4 2025 GDP slowed to 1.4% (from 4.4% in Q3); the Fed signaled no rush to resume rate cuts after pausing reductions.

Looking at fundamentals, the 4Q earnings season is now in its last throes and the results have been mostly positive for the asset class. A wave of AI/disruption angst hit technology names: software and data-centre exposed issuers were singled out by investors re-pricing future earnings risk. Spreads came under further pressure at month-end after Blue Owl gated its private credit fund, raising concerns about liquidity and default risk in this opaque market.

The structural demand provided a counterweight and supported European credit and large corporate issuance remained strong in February, driven by hyperscalers and sizeable corporate hybrid deals. Monthly issuance totaled €77bn, marginally below February last year as month-end risk aversion weighed, while year-to-date issuance reached €188bn — roughly €12bn higher than the same point a year ago.

Credit was impacted by overall geopolitical instability and pressures from AI and private credit and spreads traded wider. The Euro Corporate IG market posted a total return of 0.55% for the month. Euro IG spreads widened, ending the period at 83 bps (+9bp) whereas German 10y dropped 20bps. Financials outperformed the non-Financials during the month. Bank AT1s posted a total return of 0.43% over the month, hybrids returned 0.51%, and high-yield bonds returned 0.33% over the same period.

## Important information

This document is provided for information purposes only and does not constitute a recommendation, a solicitation, an offer, advice or an invitation to purchase or sell any units or shares of the fund (FCP), collective employee fund (FCPE), SICAV, SICAV sub-fund or SICAV investing primarily in real estate (SPPICAV) (collectively, "the Funds") described herein and should in no case be interpreted as such. This document is not a contract or commitment of any form. Information contained in this document may be altered without notice. The management company accepts no liability whatsoever, whether direct or indirect, that may arise from the use of information contained in this document. The management company can in no way be held responsible for any decision or investment made on the basis of information contained in this document. The information contained in this document is disclosed to you on a confidential basis and shall not be copied, reproduced, modified, translated or distributed without the prior written approval of the management company, to any third person or entity in any country or jurisdiction which would subject the management company or any of the funds, to any registration requirements within these jurisdictions or where it might be considered as unlawful. Not all of the funds are systematically registered in all jurisdictions of all investors. Investment involves risk. The past performances shown in this document, and simulations based on these, do not guarantee future results, nor are they reliable indicators of future performance. The value of an investment in units or shares of the funds may fluctuate according to market conditions and cause the value of an investment to go up or down. As a result, fund investors may lose all or part of the capital originally invested. All potential investors in the funds are advised to ascertain whether such an investment is compatible with the laws to which they are subject and the tax implications of such an investment prior to investing, and to familiarise themselves with the legal documents in force for each fund. Concerning mandates, this document is a part of the periodic statement of the management activities of your portfolio and must be read in conjunction with any other periodic statement or notice of confirmation provided by your custodian and related to the transactions of your portfolio. Unless stated otherwise, the management company is the source of the data in this document. The date of the data in this document is that indicated at the top of the document, unless otherwise stated.

This material is solely for the attention of institutional, professional, qualified or sophisticated investors and distributors. It is not to be distributed to the general public, private customers or retail investors in any jurisdiction whatsoever nor to "US Persons". Moreover, any such investor should be, in the European Union, a "Professional" investor as defined in Directive 2004/39/EC dated 21 April 2004 on Markets In Financial Instruments ("MiFID") or as the case may be in each local regulations and, as far as the offering in Switzerland is concerned, a "Qualified Investor" within the meaning of the provisions of the Swiss Collective Investment Schemes Act of 23 June 2006 (CISA), and its implementing Ordinance of 22 November 2006 (CISO) and the FINMA's 2013/9 on distribution within the meaning of the legislation on Collective Investment. In no event may this material be distributed in the European Union to non "Professional" investors as defined in the MiFID or in each local regulation, or in Switzerland to investors who do not comply with the definition of "qualified investors" as defined in the applicable legislation and regulation.

BOND

Green Bonds Lexicon

**Green/Sustainable/Social Bonds breakdown**

Green bonds are fixed income instruments for which the proceeds are specifically designated for projects with clearly defined environmental benefits. Eligible projects include, but are not limited to, renewable energy, energy efficiency (including efficient buildings), sustainable waste management, sustainable land use, biodiversity conservation, clean transportation and clean water. The issuer should outline the decision-making process it follows to determine the eligibility of an individual investment in the legal documentation for the security:

- 1) Use of proceeds
- 2) Project evaluation and selection
- 3) Management of proceeds
- 4) Reporting

**EU Environmental Objectives**

The Green Credit Continuum Program has been designed to support the European Union Climate Goals and the European Union Sustainable Finance agenda, in that it aims to expand financing of environmental investments while fostering best standards and practices in project selection and impact assessment and reporting.

All green projects financed by the Fund will be in line with the European Union's 6 environmental objectives. These are:

- Climate change mitigation
- Climate change adaptation
- Sustainable use of water and marine resources
- Transition to a circular economy, waste prevention and recycling
- Pollution prevention and control
- Protection of healthy ecosystems

**ESG criteria**

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:

- “E” for Environment (energy and gas consumption levels, water and waste management, etc.).
- “S” for Social/Society (respect for human rights, health and safety in the workplace, etc.).
- “G” for Governance (independence of board of directors, respect for shareholders’ rights, etc.)

Rating scale from A (best score) to G (worst score)
