Investment Objective

Seeks to achieve a positive return in all types of market conditions over the recommended holding period. The Sub-Fund invests, directly or indirectly, in a broad range of securities from around the world, including emerging markets. These investments may include government and corporate bonds of any maturity, equities, convertible bonds and money market securities. The Sub-Fund may also seek exposure to commodities, real estate, and currencies. The Sub-Fund may invest up to 50% of its assets in equities and up to 25% in convertible bonds (including up to 10% in contingent convertible bonds). The Sub-Fund's investments will mainly be denominated in euro, other European currencies, U.S. dollar or Japanese yen.

The Sub-Fund makes extensive use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on credit, equities, interest rates, foreign exchange, volatility and inflation). The Sub-Fund may use derivatives to gain exposure to loans up to a maximum of 20% of its assets.

Benchmark : The Sub-Fund is actively managed. The Sub-Fund may use a benchmark a posteriori as an indicator for assessing the Sub-Fund's performance and, as regards the performance fee benchmark used by relevant share classes, for calculating the performance fees. There are no constraints relative to any such Benchmark restraining portfolio construction.

Management Process : The investment manager first constructs a macro strategy portfolio to provide a return not correlated to any market, and then overlays this with an investment strategy to generate excess return.

Fund Statistics

	Portfolio
Modified Duration	7.47
Number of Lines	1576

Modified duration (in points) estimates a bond portfolio's percentage price change for 1% change in yield

* Source : Amundi. The above results pertain to full 12-month period per calendar year. All performances are calculated net income reinvested and net of all charges taken by the Sub-Fund and expressed with the round-off superior. Past performance is not a reliable indicator of future performance. The value of investments may vary upwards or downwards according to market conditions.

Risk & Reward Profile (SRII)

Lower risk, potentially lower rewards

Higher risk, potentially higher rewards

The SRII represents the risk and return profile as presented in the Key Investor Information Document (KIID). The lowest category does not imply that there is no risk. The SRII is not guaranteed and may change over time.

The risk level of this Sub-Fund reflects the maximum projected volatility of the portfolio.

Additional Risks

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- **Credit risk**: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.
- **Liquidity risk**: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- **Counterparty risk**: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- **Operational risk**: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- **Emerging Markets risk** : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries. The use of complex products such as financial derivative instruments might increase market movements in your portfolio. The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
