

## Key Investor Information

This document provides you with key investor information about this Sub-Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Sub-Fund. You are advised to read it so you can make an informed decision about whether to invest.

### AMUNDI S.F. - ABSOLUTE RETURN MULTI-STRATEGY CONTROL - A EUR A Sub-Fund of AMUNDI S.F.

ISIN code: (A) LU1410363276

Management Company: Amundi Luxembourg SA

#### Objectives and Investment Policy

Seeks to achieve a positive return in all types of market conditions over the recommended holding period.

The Sub-Fund invests in a broad range of securities from around the world, including emerging markets. These investments may include government, supranational and corporate bonds of any maturity, equities, convertible bonds and money market securities. The Sub-Fund may also seek exposure to commodities, real estate and currencies. The Sub-Fund may invest up to 30% of its assets in equities, up to 10% in convertible bonds and up to 10% in contingent convertible bonds. The Sub-Fund's investments will mainly be denominated in euro, other European currencies, U.S. dollar or Japanese yen. The Sub-Fund makes extensive use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (either long or short) to various assets, markets or income streams. This may generate a high level of leverage. In particular, the Sub-Fund may invest in short and medium term interest rate swaps.

**Benchmark** : The Sub-Fund is actively managed. The Sub-Fund may use a benchmark a posteriori as an indicator for assessing the Sub-Fund's performance and, as regards the performance fee benchmark used by relevant share classes, for calculating the performance fees. There are no constraints relative to any such Benchmark restraining portfolio construction.

**Management Process** : The Sub-Fund integrates Sustainability Factors in its investment process and takes into account principal adverse impacts of investment decisions on Sustainability Factors as outlined in more detail in section "Sustainable Investment" of the Prospectus.

The investment manager pursues two distinct strategies to diversify the source of return. First, a diversified portfolio is constructed based on macroeconomic, thematic and regional scenarios to achieve returns not correlated to the direction of any particular asset class, sector or region. Then a strategy overlay is created to generate excess return by pursuing diversified and non-correlated investment strategies.

This is a non-distributing unit class. Investment income is re-invested.

The minimum recommended holding term is 3 years.

Investors may sell on demand on any business day in Luxembourg.

#### Risk and Reward Profile

The risk level of this Sub-Fund reflects the maximum projected volatility of the portfolio.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

The use of complex products such as financial derivative instruments might increase market movements in your portfolio.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.

## Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

<b>Entry charge</b>	5.00%
<b>Exit charge</b>	None
<b>Conversion charge</b>	1.00%

This is the maximum that might be taken out of your money before the proceeds of your investment are paid out.

### Charges taken from the Sub-Fund over a year

<b>Ongoing charges</b>	1.07%
------------------------	-------

### Charges taken from the Sub-Fund under certain specific conditions

<b>Performance fee</b>	15.00% a year of any returns the Sub-Fund achieves above ESTR (Euro Short-Term Rate) index
	Over the last accounting year, a performance fee of 0.00% was charged.

The **entry** and **conversion charges** shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The **ongoing charges** figure is based on expenses for the year ending December 31, 2021. This figure may vary from year to year. It excludes:

- Performance fees,
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Sub-Fund when buying or selling units in another collective investment undertaking.

The calculation of the performance fee applies on each Net Asset Value calculation date in accordance with the terms and conditions described in the prospectus.

The comparison of the Net Asset Value of the share class and the Reference Asset (as defined in the prospectus) is carried out over an observation period of maximum five years. The performance fee represents the adjacent percentage of the difference between the net assets of the share Class (before deduction of the performance fee) and the Reference Asset if the difference is positive, and if the relative performance of the share class compared to the Reference Asset is positive or nil, since the beginning of the performance observation period. Past underperformances over the last 5 years should be clawed back before any new accrual of performance fee.

The anniversary date corresponds to the day of the last Net Asset Value of the month of December.

Performance fee accruals will be paid to the Management Company on an anniversary date and a new observation period starts.

The performance fee is not paid to the Management Company if the performance of the share class over the performance observation period is negative, while remaining higher than the performance of the Reference Asset.

For more information about charges, please see charges paragraph of the prospectus of the UCITS, which is available at: [www.amundi.lu/amundi-funds](http://www.amundi.lu/amundi-funds).
