AMUNDI UNICREDIT PREMIUM PORTFOLIO - PRUDENTIAL - A - CZKH A Sub-Fund of AMUNDI UNICREDIT PREMIUM PORTFOLIO

ISIN code: (A) LU1436216698

Management Company: Amundi Luxembourg SA

Objectives and Investment Policy

This Sub-Fund seeks to achieve capital appreciation over the recommended holding period by investing in a diversified portfolio of the permissible instruments described below.

The Sub-Fund invests primarily, either directly or, indirectly, through open-ended UCIs and UCITS, in debt and debt-related instruments issued by any OECD government or by supranational bodies, local authorities and international public bodies or by corporate bodies, including convertible bonds and bonds with warrants attached, as well as Money-Market Instruments, deposits subject to call with a maximum term of 12 months, and interest rate certificates. The Sub-Fund may also invest up to 10% of its assets in commodity-linked UCIs and UCITS and up to 20% of its assets in equity-linked UCIs and UCITS. The Sub-Fund may invest in both Investment Grade and sub-Investment Grade debt and debt-related instruments. The Sub-Fund seeks to achieve its investment objective through an active and flexible allocation to these assets classes and aims to control volatility by applying a disciplined risk budgeting process. The Sub-Fund actively manages currency exposure and may hold positions in any currency in connection with its investments.

Benchmark : The Sub-Fund is actively managed. The Sub-Fund may use a benchmark a posteriori as an indicator for assessing the Sub-Fund's performance and, as regards the performance fee benchmark used by relevant share classes, for calculating the performance fees. There are no constraints relative to any such Benchmark restraining portfolio construction.

Management Process : The Sub-Fund integrates Sustainability Factors in its investment process and takes into account principal adverse impacts of investment decisions on Sustainability Factors as outlined in more detail in section "Sustainable Investment" of the Prospectus.

Investment in underlying funds is made using in-house research techniques to evaluate the people involved, the team structure and experience, the investment philosophy, the key management and administration policies and processes (e.g. risk management, remuneration) of those underlying funds. Past performance is assessed in relation to the underlying funds' risk in different markets conditions and in the context of relevant peer groups.

This is a non-distributing unit class. Investment income is re-invested.

The minimum recommended holding term is 3 years.

Investors may sell on demand on any business day in Luxembourg.

Risk and Reward Profile

The risk level of this Sub-Fund reflects the risk of its allocation, which is mainly exposed to the bond market.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.
- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Hedging risk : The currency hedging may be imperfect and generate a difference between the performance of the Sub-Fund and the unit-class you are invested in.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
