

Key Investor Information

This document provides you with key investor information about this Sub-Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Sub-Fund. You are advised to read it so you can make an informed decision about whether to invest.

AMUNDI FUNDS PROTECT 90 - G2 EUR A Sub-Fund of the SICAV AMUNDI FUNDS

ISIN code: (A) LU1534106825

This UCITS has appointed Amundi Luxembourg SA, an entity part of Amundi group, as its Management Company

Objectives and Investment Policy

The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

To provide a participation in financial markets evolution while also providing permanent partial protection of your investment over the recommended holding period. Specifically, the Sub-Fund is designed to ensure that its share price does not fall below 90% of the highest net asset value recorded from 5 June 2020.

The Sub-Fund may invest between 0% and 100% of net assets in equities, bonds, convertible bonds, deposits and money market instruments, and in UCITS/UCIs that may be exposed to a broad range of asset classes, including those named above as well as currencies, emerging markets securities, commodities, real estate, etc.

The Sub-Fund may invest up to 30% of net assets in below investment-grade bonds (high-yield bonds).

The Sub-Fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on credit, equities, interest rates, and foreign exchange).

Benchmark : The Sub-Fund is actively managed, is not managed in reference to a benchmark and has not designated a reference benchmark for the purpose of the Disclosure Regulation.

Management Process : The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The investment team pursues a dynamic capital-preservation strategy, in which assets are reallocated constantly between the growth component and the conservative component, depending on the investment team's analysis of market factors. The Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of its investment universe.

The accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.

The minimum recommended holding term is 3 years.

Shares may be sold or redeemed (and/or converted) on any dealing day (except otherwise stated in the prospectus) at the respective dealing price (net asset value) in accordance with the articles of incorporation. Further details are provided in the prospectus of the UCITS.

Guarantor : Amundi S.A.

The protection is granted by the Guarantor to the Sub-Fund for shareholders regardless of the subscription date and the redemption date of their shares for an initial period of five years and tacitly renewed for successive further periods of one year.

Risk and Reward Profile

The risk level of this Sub-Fund mainly reflects the market risk arising from investments in the equity and interest rate markets.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.
- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.

- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio. Should the Sub-Fund's Guarantor default, the Sub-Fund would be exposed to the difference between the guaranteed amount and the Sub-Fund's Net Asset Value.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
