

Key Investor Information

This document provides you with key investor information about this Sub-Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Sub-Fund. You are advised to read it so you can make an informed decision about whether to invest.

AMUNDI FUNDS VOLATILITY EURO - Q-R3 EUR AD A Sub-Fund of the SICAV AMUNDI FUNDS

ISIN code: (D) LU1638825312

This UCITS has appointed Amundi Luxembourg SA, an entity part of Amundi group, as its Management Company

Objectives and Investment Policy

To achieve a positive return in any type of market condition (absolute return strategy).

The Sub-Fund invests in exchange-traded options on the Euro Stoxx 50 index that have a one-year average maturity. Any assets that remain uninvested after the Sub-Fund has reached its target volatility exposure are invested in money market instruments. The Sub-Fund may invest up to 100% of net assets in these liquid investments.

The Sub-Fund makes extensive use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on equities, interest rates, foreign exchange and dividend).

Benchmark : The Sub-Fund is actively managed and seeks to outperform the Euro Short Term Rate Index (ESTER) + 3% per annum, over the recommended holding period, while offering controlled risk exposure. The Sub-Fund may use a benchmark a posteriori as an indicator for assessing the Sub-Fund's performance and, as regards the performance fee benchmark used by relevant share classes, for calculating the performance fees. There are no constraints relative to any such Benchmark restraining portfolio construction.

Management Process : The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The investment team analyses market volatility patterns to determine the direction and extent of its volatility exposure: positive exposure when volatility is low and anticipated to rise, negative exposure when volatility is high and anticipated to decline. It also seeks to benefit from short term fluctuations of volatility ("volatility of the volatility").

The distribution share pays dividends in September of each year.

The minimum recommended holding term is 3 years.

Shares may be sold or redeemed (and/or converted) on any dealing day (except otherwise stated in the prospectus) at the respective dealing price (net asset value) in accordance with the articles of incorporation. Further details are provided in the prospectus of the UCITS.

Risk and Reward Profile

The risk level of this Sub-Fund mainly reflects the investment positions given market volatility within the pre-defined leeway.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.

- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.

The use of complex products such as financial derivative instruments might increase market movements in your portfolio.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.

Charges

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	4.50%
Exit charge	None
Conversion charge	1.00%

This is the maximum that might be taken out of your money before the proceeds of your investment are paid out.
