You are advised to read it so you can make an informed decision about whether to invest.

AMUNDI INVESTMENT FUNDS - TACTICAL PORTFOLIO INCOME - E EUR MGI A Sub-Fund of the SICAV AMUNDI INVESTMENT FUNDS

ISIN code: (D) LU1828117934

This UCITS has appointed Amundi Luxembourg SA, an entity part of Amundi group, as its Management Company

Objectives and Investment Policy

The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

This Sub-Fund seeks to achieve capital appreciation over the recommended holding period by investing primarily in a diversified portfolio of equities and equity-linked instruments, Money-Market Instruments, debt and debt-related instruments, including asset-backed securities and mortgage-backed securities (up to 20% of its assets), and commodity-linked instruments. The Sub-Fund invests in a broad range of issuers, including but not limited to, governmental issuers, supranational bodies, local authorities, international public bodies and corporate issuers incorporated, headquartered or having their principal business activities in any geographical region including Emerging Markets.

The Sub-Fund employs a top-down approach to identify an attractive risk/return trade-off across asset classes, countries and global sectors to achieve capital stability and a bottom up approach to generate income. The top-down view is represented by a series of directional and relative value investments whilst mitigating some of the key risks within that view. The Sub-Fund will pursue other investment strategies to diversify sources of return or mitigate risk. The Sub-Fund principally targets directional and non-directional strategies on interest rate, credit risk, equity, corporate bond, currencies, duration and commodities. The strategies may take advantage of price differentials between correlated financial instruments, or on the direction the market or a specific security is heading. The bottom up view consists of selecting instruments according to their ability to maximize income generation across countries and asset classes.

The Sub-Fund may invest up to 10% of its assets in other UCIs and UCITS.

The Sub-Fund will make extensive use of financial derivative instruments for investment purposes that may generate a high level of gross leverage. In particular, the Sub-Fund may invest in short and medium-term interest rates swaps which may be used with a substantial level of gross leverage in order to generate the desired level of return. The Sub-Fund may also use financial derivative instruments for taking long and short positions, which may increase its level of risk, as well as for hedging and efficient portfolio management purposes, which may contribute to reducing the Sub-Fund's level of risk. Financial derivative instruments may also include credit-default swaps, inflation swaps, swaptions, futures, forwards and options.

Benchmark : The Sub-Fund is actively managed and is not managed in reference to a benchmark.

The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in the "Sustainable Investment" section of the Prospectus. The Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of its investment universe. In determining the ESG score of the Sub-Fund and the universe, ESG performance is assessed by comparing the average performance of a security against the security issuer's industry in respect of each of the three ESG characteristics of environmental, social and governance. The selection of securities through the use of Amundi's ESG rating methodology takes into account principal adverse impacts of investment decisions on Sustainability Factors according to the nature of the Sub-Fund.

The distribution share pays dividends monthly.

The minimum recommended holding term is 4 years.

Investors may sell on demand on any business day in Luxembourg.

Risk and Reward Profile

The risk level of this Sub-Fund mainly reflects the investment positions taken in various asset classes (volatility, fixed-income, foreign exchange and equities) within the pre-defined leeway.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the share class.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.
- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

The use of complex products such as financial derivative instruments might increase market movements in your portfolio.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
