

Key Investor Information

This document provides you with key investor information about this Compartment. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Compartment. You are advised to read it so you can make an informed decision about whether to invest.

CPR Invest - Climate Action - A EUR - Acc A Compartment of CPR Invest (SICAV)

ISIN code : (A) LU1902443420

This Compartment is managed by CPR Asset Management, a company of the group Amundi

Objectives and Investment Policy

The Compartment's sustainable investment is focused on tackling climate change and aims to obtain a lower carbon intensity than its reference index or Investment universe by selecting investments as described below.

The Compartment integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus.

The Compartment's objective is to outperform global equity markets over a long-term period (minimum of five years) by investing in international equities committed to limiting impact of climate change, while integrating Environmental, Social and Governance (E, S, and G – or, when taken together, ESG) criteria in the investment process.

The investment strategy of the Compartment aims to select securities of companies of any countries, sectors, and any capitalization.

Each sector is analysed and securities are selected based on the fund manager's investment convictions. The final portfolio consist of companies offering the best financial and non-financial prospects.

In order to select companies that are in the best position to tackle climate change, the Management Company relies on CDP's data.

CDP is a provider specialised in environment-related information.

Companies in the investment universe are analysed from a climate perspective so as to select those that are most virtuous according to the CDP's assessment standards.

The investment universe is made up of at least 90% of companies with a CDP score.

At least, 90% of portfolio stocks are rated by the CDP and have an ESG score.

The Management Company integrates an additional sustainable approach by analyzing companies that have already been selected on the basis of its internal ESG analysis methodology and excluding those based on the following :

- worst overall ESG scores ;
- worst Environment and Governance scores ;
- worst scores on Environmental sub-criteria ;
- high ESG controversies.

Depending on the improvement of data availability and consistency, the Management Company may use additional data it considers to fine tune the way it identifies companies that are in the best position to tackle climate change.

The Management Company undertakes to reduce the investment universe by at least 20% by excluding companies with the worst CDP climate scores and those excluded from its own internal ESG analysis methodology.

The investment process implemented aims to build a portfolio in line with the Paris Agreement 1.5° temperature goal and whose carbon footprint will be lower compared to the MSCI All Country World Index (MSCI ACWI) Net Return Index which is representative of its investment universe.

The Management Company has set up a mechanism that offsets the residual carbon footprint of the compartment through the use of Verified Emission Reduction units ('VERs') that finance projects which decrease or avoid CO2 emissions. For further information, please refer to the prospectus.

The carbon footprint reduction policy and socially responsible investment policy (objectives, criteria, ratings) are further detailed and available on the Company website ('SRI transparency code' of the Compartment).

The Compartment is invested for at least 75% of its assets in equity and equity equivalent securities of any country without constraints of capitalization. Among this proportion of 75% of its assets, the Compartment may invest in China A shares via Stock Connect within a maximum of 25% of its assets.

The Compartment is actively managed. The Compartment may use a Benchmark a posteriori as an indicator for assessing the Compartment's performance and, as regards the performance fee benchmark used by relevant share classes, for calculating the performance fees. There are no constraints relative to any such Benchmark restraining portfolio construction.

Derivative instruments may be used by the Compartment for hedging, arbitrage, exposure purposes and/or efficient portfolio management.

The Compartment pursue Article 9 of the Disclosure Regulation regarding sustainable investments.

CPR Invest - Climate Action - A EUR - Acc is EUR denominated.

CPR Invest - Climate Action - A EUR - Acc has a recommended investment horizon of more than 5 years .

CPR Invest - Climate Action - A EUR - Acc accumulates its net profit and net realized capital gains.

You may redeem your shares at each net asset value, calculated on a daily basis in accordance with the terms specified in the prospectus.

Risk and Reward Profile

This Compartment's risk level reflects its international equities investment theme.

- The historical data used to calculate the numeric risk indicator could not be a reliable indicator of the future risk profile of the Compartment.
- The risk category associated with this Compartment is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.
- The capital is not guaranteed.

Major risks for the Compartment not included in the indicator are :

- Credit risk: this is the risk of sudden downgrading in the creditworthiness of an issuer or that of its default.
- Liquidity risk: it presents the risks that a financial market, when volumes traded are low or if there are tensions on such market, might not be able to absorb the sell (or buy) volumes without causing the price of the assets to significantly drop (or rise).
- Counterparty risk: this is the risk of default of a market participant preventing it from honoring its commitments in respect of your portfolio.
- The use of financial derivatives instruments might increase or decrease the capacity of your portfolio to amplify market's movements.

The occurrence of any of these risks may lower the net asset value of your Compartment. To learn more about the risks, please refer to the Risk Profile section of the Compartment in the prospectus.

Charges

The charges you pay are used to pay the costs of running the Compartment, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5,00 %
Exit charge	None

The percentage indicated is the maximum that might be taken from your capital before it is invested (entry) or redeemed (exit).

Charges taken from the Compartment over a year

Ongoing charges	1,95%* (including tax) of the average net assets
-----------------	--

Charges taken from the Compartment under certain specific conditions

Performance fee	15% (including tax) annual of the performance of the Compartment above the Reference Asset. No commission was taken over the last accounting year.
-----------------	---

The **entry and exit charges** shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

*The ongoing charges figure is based on expenses for the year ending December 31, 2021. This figure may vary from year to year.

It excludes :

- Performance fees,
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Compartment when buying or selling units or shares in another UCI.

The calculation of the performance fee applies on each net asset value calculation date in accordance with the terms and conditions described in the prospectus.

The comparison of the net assets of the share and the Reference Asset (as defined in the prospectus) is carried out over an observation period of maximum five years. The performance fee represents 15% of the difference between the net asset of the share (before deduction of the performance fee) and the Reference Asset if the difference is positive, and if the relative performance of the share class compared to the Reference Asset is positive or nil, since the beginning of the performance observation period. Past underperformances over the last 5 years should be clawed back before any new accrual of performance fee.

The anniversary date corresponds to the day of calculation of the last net asset value of the month of December.

Performance fee accruals will be paid to the Management Company on an anniversary date and a new observation period starts.

The performance fee is paid even if the performance of the share over the performance observation period is negative, while remaining higher than the performance of the Reference Asset.

For more information about charges of the Compartment, please refer to the "Charges and expenses" section of the prospectus, which is available at www.cpr-am.com or upon request from the Management Company.

Past Performance

- The chart shown is not a reliable indicator of future performance.
- The Compartment was approved on November 8, 2018.
- The Compartment was launched on December 7, 2018.
- The Share Class was launched on December 7, 2018.
- This Compartment does not have a benchmark index.
The MSCI World ACWI Net Return Index denominated in EUR is shown for comparison purposes and if applicable for calculating the performance fee.
- Annual performance is calculated on the basis of the net asset values denominated in EUR and all fees included.
