

Key Investor Information

This document provides you with key investor information about this Sub-Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Sub-Fund. You are advised to read it so you can make an informed decision about whether to invest.

AMUNDI INVESTMENT FUNDS - OPTIMISER - I EUR A Sub-Fund of the SICAV AMUNDI INVESTMENT FUNDS

ISIN code: (A) LU2050942452

This UCITS has appointed Amundi Luxembourg SA, an entity part of Amundi group, as its Management Company

Objectives and Investment Policy

The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

This Sub-Fund seeks to achieve capital appreciation over the recommended holding period by investing in a diversified portfolio of equities and equity-linked instruments, Money Market Instruments, financial derivative instruments linked to commodity futures indices, debt and debt-related instruments issued by companies or governments worldwide.

The Sub-Fund may invest in Emerging Markets. The Sub-Fund may also invest up to 10% of its assets in contingent convertible bonds.

The Sub-Fund may invest up to 10% of its assets in other UCIs and UCITS.

The Sub-Fund pursues two distinct groups of strategies to diversify the sources of return. First, it constructs a macro strategy portfolio through an asset allocation and long or short positioning process driven by macroeconomic, thematic and regional scenarios in order to achieve returns not correlated to the specific direction of any particular asset class, sector or region. It then creates a strategy overlay to generate excess return by pursuing diversified and non-correlated investment strategies.

The macro strategy portfolio will consist of any type of equities and equity-linked instruments as well as debt and debt-related instruments.

The excess return strategy may include different fixed income sectors, as well as sovereign bonds across the maturity spectrum issued by different countries and inflation-linked bonds, equities and equity-linked instruments as well as commodity and real-estate-linked instruments.D26

In order to achieve its target returns, the Sub-Fund will make extensive use of financial derivative instruments for investment purposes that may generate a high level of gross leverage both in its macro strategy portfolio and its excess return strategy.

Benchmark : The Sub-Fund is actively managed. The Euro short-term rate, serves a posteriori as an indicator for assessing the Sub-Fund's performance and for the relevant share classes calculating the performance fees. There are no constraints relative to any such Benchmark restraining portfolio construction. The Sub-Fund has not designated the Benchmark as a reference benchmark for the purpose of the Disclosure Regulation.

The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in the "Sustainable Investment" section of the Prospectus. The Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of the Benchmark. In determining the ESG score of the Sub-Fund and the Benchmark, ESG performance is assessed by comparing the average performance of a security against the security issuer's industry in respect of each of the three ESG characteristics of environmental, social and governance. The selection of securities through the use of Amundi's ESG rating methodology takes into account principal adverse impacts of investment decisions on Sustainability Factors according to the nature of the Sub-Fund.

This is a non-distributing share class. Investment income is re-invested.

The minimum recommended holding term is 4 years.

Investors may sell on demand on any business day in Luxembourg.

Risk and Reward Profile

The risk level of this Sub-Fund reflects its exposure limits to different asset classes.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the share class.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.

- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

The use of complex products such as financial derivative instruments might increase market movements in your portfolio.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
