You are advised to read it so you can make an informed decision about whether to invest.

AMUNDI FUNDS ABSOLUTE RETURN GLOBAL OPPORTUNITIES BOND DYNAMIC - I2 USD

A Sub-Fund of the SICAV AMUNDI FUNDS

ISIN code: (A) LU2247576031

This UCITS has appointed Amundi Luxembourg SA, an entity part of Amundi group, as its Management Company

Objectives and Investment Policy

The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

To achieve a positive return (measured in U.S. dollar) in all types of market conditions over the recommended holding period.

The Sub-Fund's performance is derived from active investment allocation between various strategies described below applied on debt instruments of companies around the world, including emerging markets. In applying these strategies, the Sub-Fund will be mainly invested in any type of bonds, including subordinated bonds, up to 49% of net assets in below-investment-grade bonds, up to 15% of its assets in Chinese bonds denominated in local currency (including via Direct CIBM access), up to 20% of net assets in mortgage-backed securities (MBS) and asset-backed securities (ABS) and up to 10% in contingent convertible bonds.

Benchmark : The Sub-Fund is actively managed and seeks to outperform (after applicable fees) the USD Libor 3-months Index over the recommended holding period, while offering controlled risk exposure. The Sub-Fund uses the Benchmark a posteriori as an indicator for assessing the Sub-Fund's performance and, as regards the performance fee, as a benchmark used by relevant share classes, for calculating the performance fees. There are no constraints relative to any such Benchmark restraining portfolio construction. Further, the Sub-Fund has not designated the Benchmark as a reference benchmark for the purpose of the Disclosure Regulation.

Management Process : The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The investment manager manages the Sub-Fund by utilising a research-driven approach to identify and capture mispriced risk premia across a global investment universe. Based on a detailed top-down assessment of global market conditions and using proprietary risk management tools, the Sub-Fund investment manager implements a dynamic risk allocation process to shift risk across three key investment strategies and also integrates bottom-up idea generation and investment opportunities using sector and asset class expertise. The three key investment strategies the investment process is based on are Alpha Opportunities, Dynamic Beta and Core Income.

Further, the Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of its investment universe.

The accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.

The minimum recommended holding term is 4 years.

Shares may be sold or redeemed (and/or converted) on any dealing day (except otherwise stated in the prospectus) at the respective dealing price (net asset value) in accordance with the articles of incorporation. Further details are provided in the prospectus of the UCITS.

Risk and Reward Profile

The risk level of this Sub-Fund mainly reflects the investment in long and short positions taken in the fixed-income market within the pre-defined leeway.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.

- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

The use of complex products such as financial derivative instruments might increase market movements in your portfolio.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
