Seeks to increase the value of your investment and to provide income over the recommended holding period.

The Sub-Fund invests mainly in government bonds, corporate bonds and money market instruments issued by the government of India, state governments of India, or their agencies and companies incorporated or headquartered in India.

The Sub-Fund's assets may be denominated in Indian Rupee as well as any OECD currency. Investment in Indian bonds may from time to time be restricted by Indian domestic regulation and hence the Sub-Fund may have significant exposure to US Dollar denominated investments issued by entities outside India.

The Sub-Fund makes use of derivatives to reduce various risks and for efficient portfolio management.

Benchmark : The Sub-Fund is actively managed and seeks to outperform (after applicable fees) the JPM GBI-EM Broad India sub-index. The Sub-Fund is mainly exposed to the issuers of the benchmark, however, the management of the Sub-Fund is discretionary, and will be exposed to issuers not included in the benchmark. The Sub-Fund monitors risk exposure in relation to the benchmark and the extent of deviation from the Benchmark is expected to be significant.

Management Process : The Sub-Fund integrates Sustainability Factors in its investment process and takes into account principal adverse impacts of investment decisions on Sustainability Factors as outlined in more detail in section "Sustainable Investment" of the Prospectus.

The investment manager will use combination of top down and bottom up approach for constructing the portfolio to achieve income accrual and capital appreciation. The investment manager may optimize returns by combining exposure to the Indian Rupee, interest rates and credit spreads while maintaining a high level of liquidity.

This is a non-distributing unit class. Investment income is re-invested.
