AMUNDI FUNDS MONTPENSIER M CLIMATE SOLUTIONS - E2 EUR A Sub-Fund of the SICAV AMUNDI FUNDS

ISIN code: (A) LU2349693825

This UCITS has appointed Amundi Luxembourg SA, an entity part of Amundi group, as its Management Company

Objectives and Investment Policy

Seeks to achieve capital growth over the recommended holding period through investment in Sustainable Investments pursuant to Article 9 of the Disclosure Regulation. Specifically, the sub-fund invests as a feeder fund in the Montpensier M Climate Solutions fund that seeks to share in the development of global equity markets by investing primarily in shares of companies whose initiatives or solutions contribute directly or indirectly to reducing the impacts of climate change, or in shares of companies part of whose activity concerns trends and developments linked to the theme of the energy and climate transition.

Specifically, the sub-fund invests at least 85% of net assets in units of the master fund (Y class). The sub-fund may invest up to 15% in deposits.

The master fund invests at least 75% of its net assets in equities and similar instruments (like certificates of investment and convertible bonds) of companies around the world, in all business sectors and all geographical regions including up to 40% of the assets in emerging markets. Instruments that are equivalent to equity may represent up to 25% of the net assets. There are no market capitalisation constraints for these investments.

The master fund makes use of derivatives to reduce various risks, to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives that focus on credit and equities).

Benchmark : The master fund is actively managed. The reference to an index is only for subsequent comparison purposes.

The Stoxx Global 1800 (SXW1R) serves a posteriori as an indicator for assessing the sub-fund's performance.

Management Process : The Master Fund's management strategy uses a dual approach to identify stocks: (i) stock picking on the basis of non-financial criteria with the aim of identifying companies' involvement in the energy and ecological transition for climate. Certain activities, such as nuclear and fossil fuel energy will be excluded; (ii) completed by a fundamental analysis supported by a quantitative study based on financial ratios.

The investment universe consists of listed companies selected on the basis of ESG (Environmental, Social & Governance) criteria with a view to identifying companies' involvement with the energy and ecological transition for climate. For each line eligible to enter the portfolio, an estimate will be made of the portion of total turnover contributing directly or indirectly to the energy and ecological transition. More information on the management process, including data providers, measurement parameters and stock selection available in the Prospectus.

The extra-financial approach implemented is in line with a risk mitigation objective in terms of sustainability.

The accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.

The minimum recommended holding term is 5 years.

Shares may be sold or redeemed (and/or converted) on any dealing day (except otherwise stated in the prospectus) at the respective dealing price (net asset value) in accordance with the articles of incorporation. Further details are provided in the prospectus of the UCITS.

Risk and Reward Profile

The risk level of this Sub-Fund mainly reflects the market risk arising from investments in small and mid cap equities.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.

The respective dealing cut-off time for the Sub-Fund and the Master Fund are set so that valid subscription or redemption orders for shares of the Sub-Fund are placed before the cut-off time of the Master Fund so as to be processed at a same dealing day. Further details are provided in the prospectus of the Master Fund.

- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.
- Emerging Markets risk : Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
