

Key Investor Information

This document provides you with key investor information about this Sub-Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Sub-Fund. You are advised to read it so you can make an informed decision about whether to invest.

FCH Fidelity Europe Equity - A EUR AD A Sub-Fund of the SICAV Fund Channel Investment Partners

ISIN code: (D) LU2351330753

This UCITS has appointed Amundi Luxembourg SA, an entity part of Amundi group, as its Management Company

Objectives and Investment Policy

The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

To outperform the benchmark through active management by selecting a portfolio of European securities.

The investment manager invests mainly in European equity and equity linked instruments without limitation as to market sectors and geographical distribution but also in terms of weighting of securities. The investment manager selects the companies that make up for the portfolio individually, from among the most promising opportunities that its financial analysts have identified within the investment universe of European equities. The sub-fund may invest up to 10% of its assets in units/shares of UCITS and in up to 10% of its assets in ADR/GDR and up to 5% in closed-ended REITS. The sub-fund may also hold cash or cash equivalent instruments on an ancillary basis.

The sub-fund may use derivatives for hedging and efficient portfolio management.

Benchmark : MSCI Europe Index (Net). The sub-fund is actively managed and may use the benchmark a posteriori as an indicator for assessing the sub-fund's performance. There are no constraints relative to any such benchmark restraining portfolio construction.

Management Process : The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The management process is based on the selection of securities with a "bottom-up" approach. The structure of the portfolio is solely the result of the choice of the individual securities which make up the portfolio, regardless of the size of the companies, the market sector to which they belong and any other "top-down" type of assessment.

The sub-fund's investment process takes Environmental, Social and Governance (ESG) factors into account as these can have a material impact on investment performance. ESG integration occurs across all sectors and markets in which the Investment Manager invests. Any companies rated D or E by Fidelity's proprietary ESG ratings are excluded. By investing in companies with superior ESG characteristics, the average ESG rating of the fund is better than the average ESG rating of the investment universe after removing the 20% worst rated names. For further information about the investment manager's sustainability policy and the way environmental or social characteristics are assessed, go to <https://www.fidelityinternational.com/about-us/corporate-sustainability/>.

The distribution share pays dividends in September of each year.

The minimum recommended holding term is 5 years.

Shares may be sold or redeemed (and/or converted) on any dealing day (except otherwise stated in the prospectus) at the respective dealing price (net asset value) in accordance with the articles of incorporation. Further details are provided in the prospectus of the UCITS.

Risk and Reward Profile

The risk level of this Sub-Fund mainly reflects the market risk arising from investments in European equities.

Historical data may not be a reliable indication for the future.

Risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

Your initial investment does not benefit from any guarantee or protection.

Important risks materially relevant to the Sub-Fund which are not adequately captured by the indicator:

- Credit risk: represents the risks associated with an issuer's sudden downgrading of its signature's quality or its default.
- Liquidity risk: in case of low trading volume on financial markets, any buy or sell trade on these markets may lead to important market variations/fluctuations that may impact your portfolio valuation.
- Counterparty risk: represents the risk of default of a market participant to fulfil its contractual obligations vis-à-vis your portfolio.
- Operational risk: this is the risk of default or error within the different service providers involved in managing and valuing your portfolio.

The occurrence of any of these risks may have an impact on the net asset value of your portfolio.
