To achieve positive returns in every market condition, while maintaining the risks and the volatility of the assets managed under control. The investment manager uses macroeconomic and market analysis to determine bond sector, geographic and currency exposure, focuses on building a low-volatility portfolio and seeks to generate additional return through tactical positions on exchange rates, interest rates and longer maturity securities (top-down approach).

The investment manager believes that it must serve shareholders' interests by providing investment solutions that deliver longterm competitive performance. The investment manager's strong commitment to sustainable investing is an integral part of this duty. Sustainable investing entails making better-informed investment decisions, addressing sustainability issues and dilemmas, including associated risks, and influencing fund portfolio companies to contribute to a positive outcome.

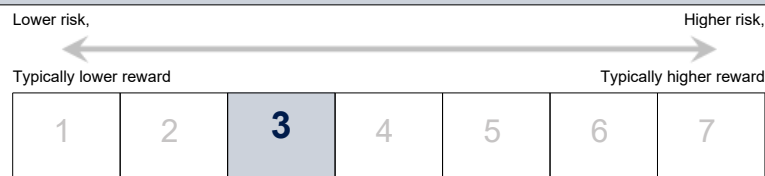

The sub-fund is subject to the investment manager's sustainable investment policy applicable in relation to direct investments in securities. It excludes securities from issuers or sectors with a low ESG profile or that are involved with controversial weapons. The sub-fund is managed based on the integration of environmental, social and corporate governance (ESG) factors that are in line with the UN-supported Principles for Responsible Investment.
