Management Process : The Sub-Fund integrates Sustainability Factors in its investment process as outlined in more detail in section "Sustainable Investment" of the Prospectus. The investment manager seeks to invest in companies with excellent capital discipline and the potential for long-term dividend growth. The investment manager believes rising dividends create upward pressure on the value of shares. The sub-fund employs a "bottom-up" stock picking approach, driven by the fundamental analysis of individual companies. Dividend yield is not the primary consideration for stock selection.

The investment manager aims to create a diversified portfolio with exposure to a broad range of countries and sectors. Stocks with different drivers of dividend growth are selected to construct a portfolio that has the potential to cope in a variety of market conditions. The sub-fund usually holds fewer than 50 stocks.

This sub-fund is ESG integrated. Financially material Sustainability Factors are systematically included in the investment analysis and investment decisions and principal adverse impacts of investment decision on Sustainability factors are taken into account. For further information about the investment manager's sustainability policy and the way environmental or social characteristics are assessed, go to www.mandg.com.
